

ATWEC Technologies Product Sales Surge in Florida Palm Beach County Schools Purchase Kiddie Voice™ Systems

Memphis, TN, February 23, 2012 (PR Newswire) – ATWEC Technologies, Inc. (OTC Markets: ATWT), a US-based child safety company, today announced that has experienced a sharp sales increase in Florida, selling its Kiddie Voice™ safety systems to day care centers located in Palm Beach County, for their buses and daycare vehicles.

In August 2011, the Palm Beach County Board of County Commissioners approved a new requirement for child safety alarm devices in vehicles used by child care centers. The deadline for meeting this requirement is September 1, 2012, but the County is encouraging schools to install the devices by April 1 in order to receive a reimbursement of \$150 per vehicle, paid by the Children's Services Council.

The Company's Kiddie Voice™ system is unique and patented, and provides a total solution for child safety. The unit, retailing at \$289 per unit, specifically meets all specifications laid out by the new rule, and as a result, the Company has seen a spike in sales, filling orders ranging from 3 to 30 units or more at various schools and centers in the Palm Beach region.

Alex T. Wiley, President & CEO of ATWEC Technologies, stated, "We have been preparing for these installs in Palm Beach County since the rule was implemented last August. Although we have received serious interest and inquiries, schools are now rushing to purchase the system in order to qualify for the large rebate. We are making unit sales every day, and our reps are personally meeting with and selling to numerous schools and daycare centers during the months of February and March. ATWEC's revenues continue to grow month by month as awareness for child safety builds."

There are an estimated 423 day care centers located in Palm Beach County. Details about ATWEC and its Kiddie Systems™ safety products can be found on the Company's website home page, www.atwec.com.
