

CONNECTICUT CHILD DIES AFTER BEING LEFT IN HOT CAR

ATWEC's New Kiddie Systems™ Product Designed To Prevent Auto Tragedies

Ridgefield, CT, July 15, 2014 (PR Newswire) – **ATWEC Technologies, Inc.** (OTC Markets: ATWT), a US-based child safety company, today sadly announced that yet another child has died after being abandoned in a hot car on a summer day with sweltering temperatures.

Ridgefield, CT police said that they were notified by Danbury Hospital staff at 6 pm on Monday that an unidentified toddler died after being left unattended in a hot car for an “extended period of time”. The exact cause of death remains under investigation, and police would not say if anyone is facing charges.

The death comes just days after a Georgia boy died after being left in a hot SUV for several hours. The case has come under national scrutiny due to evidence suggesting that the boy's parents intentionally planned the boy's death.

ATWEC Technologies, Inc. sells its proprietary Kiddie Systems™ vehicle safety products for buses and vans to directly combat and prevent these tragedies. The Company has recently developed a new product, its Kiddie Watch™ unit, which is sold to consumers for use in their cars and SUV's. The unique alarm system warns drivers to check all seats for children before leaving and/or locking the vehicle.

Connecticut residents are wondering how these incidents keep happening. “It's very sad. I can't believe it” said Rachida Hassaine of Ridgefield. Within the last month, six Connecticut caretakers have been charged with leaving children in unattended vehicles. On Tuesday, three cases of children being left in hot cars were reported.

Alex Wiley, President of ATWT, stated, “ATWEC has been fighting to stop these tragedies for years at the school and day care level, but an even bigger problem is the unsuspecting parent who leaves the child in the car. Our new Kiddie Watch™ system will warn drivers to check their vehicles, and will be a cost-effective solution for saving children's lives.” ATWEC hopes to have the product ready for market by year-end 2014.

Shareholders and other investors can find the disclosure related to these child tragedies posted on the OTC Markets website, as well as the Company's website home page, www.atwec.com.

Safe Harbor Statement

This release contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and such forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. “Forward-looking statements” describe future expectations, plans, results, or strategies and are generally preceded by words such as “may”, “future”, “plan” or “planned”, “will” or “should”, “expected,” “anticipates”, “draft”, “eventually” or “projected”.

You are cautioned that such statements are subject to a multitude of risks and uncertainties that could cause future circumstances, events, or results to differ materially from those projected in the forward-looking statements, including the risks that actual results may differ materially from those projected in the forward-looking statements as a result of various factors, and other risks identified in the Company's disclosure information.
